

Mikhail A. Golosov is a graduate of the Department of Natural Sciences of Novosibirsk State University. He has a certificate for the best diploma presentation. Currently, he is Ph.D. student and junior researcher at the Laboratory of Chemical Materials Science of the Institute of Solid State Chemistry and Mechanochemistry SB RAS. The main scientific activity includes the development and research of high-temperature oxidation-resistant materials based on iridium-containing systems and silicon carbide. Scientific achievements of Mikhail Golosov is represented by 5 published articles in high-ranking international and Russian journals, 2 patents, and 14 abstracts. Golosov's works were awarded with various awards, including a diploma of the II degree and a diploma of the winner of a participant in international conferences. Mikhail A. Golosov participated as an executor in projects supported by 2 Russian Science Foundation grants (No. 18-19-00075 2018-2022 and No. 23-19-00212 2023 — to date) and 2 Russian Foundation for Basic Research grants, also accepted participation in the implementation of the contract with JSC “UEC-Aviadvigatel”. M.A. Golosov is currently the head of the FASIE grant under the UMNIK-2021 program.
